

CSCI 599: Deep Learning and its Applications

Lecture 3

Fall 2017
Joseph J. Lim

Joseph J. Lim CSCI 599 @ USC Lecture 3

Disclaimer

- This course is taught for the 1st time @ USC. This course is 599, and thus an **experimental** course.
- The syllabus, course policy, and grading details **may change** over the semester (**check website!**)
- If you prefer a well-structured course, this is **NOT** a course for you, and I encourage you to take the course next year. We really mean this.
- But, it will be **fun** and **challenging**!

Joseph J. Lim CSCI 599 @ USC Lecture 3

Today's agenda

- CSCI 599 overview
- Learning 101
- Course Entrance 1-1

Entrance Exam

Open-ended Questions

Entrance Exam

- 5 groups based on exams
 - Group 1: excellent scores on take-home & in-class
 - Group 2: good scores on take-home & in-class
 - Group 3: well-rounded scores on in-class
 - Group 4: students who did NOT take exams
 - Group 5: none of the above
- Open-ended questions were NOT used. The main goal was to have you think about the project ahead.

Welcome to CSCI 599!

Office Hours

- Instructor OH @ SAL 214
 - Wednesday 2-3pm
 - This is NOT for homework related questions.
- TA OH @ SAL 125
 - Tuesday 1-5pm

Communication

- Please use **Piazza** for any general communication including questions
<https://piazza.com/usc/fall2017/csci599/home>
- Use e-mail ONLY when it is necessary. Seriously I don't know when...
But, the staff e-mail address is: ~~deeplearning-staff@usc.edu~~
- Any non-necessary e-mail will be ignored.
- **Register TODAY. Look for your project team mates!**

Joseph J. Lim

CSCI 599 @ USC

Lecture 3

Communication

- Please do NOT
 - e-mail us individually (**we will not reply**)
 - come to our office without appointment

CSCI 599 @ USC

Lecture 3

Syllabus

Week 3 9/6	Machine Learning 101 + Course registration	Attend Ian Goodfellow's talk (9/5)	
Week 4 9/13	Loss functions & Optimization + Neural Networks + Convolutional Neural Networks	Assignment 1 OUT	Course Project Team
Week 5 9/20	Training Neural Networks		
Week 6 9/27	CNN Architectures + Deep Learning Software		Assignment 1 DUE
Week 7 10/4	In-class Midterm		

Joseph J. Lim

CSCI 599 @ USC

Lecture 3

Module 2			
Week 8 10/11	Recurrent Neural Networks		Course Project Proposal DUE
Week 9 10/18	Guest Lectures: Xiaodi Hou (TuSimple) Phillip Isola (OpenAI)	Assignment 2 OUT	
Week 10 10/25	Generative Models		
Week 11 11/1	Deep Reinforcement Learning		Assignment 2 DUE
Module 3: Advanced Topics			
Week 12 11/8	Advanced topics 1		Course Project Mid-report
Week 13 11/15	Advanced topics 2		
Week 14 11/22	No lecture (Thanksgiving)		
Week 15 11/29	Term Project Presentation (4 hours) Spotlight + Poster		
FINAL	No Final		

Subject to change!

Joseph J. Lim

CSCI 599 @ USC

Lecture 3

Lecture format

- 1st module: mostly lectures
- 2nd/3rd module: lecture + TA's paper presentations

Important Dates

- Assignment 1: week 6
- Midterm: week 7
- Assignment 2: week 11
- Project
 - Team formation: **week 4**
 - Project proposal: week 8
 - Project meeting with TA #1: between week 4 - week 8
 - Project meeting with Instructor #1: week 8 (M-W)
 - Project mid-report: week 12
 - Project meeting with TA #2: between week 8 - week 12
 - Project meeting with Instructor #2: week 11 (M-W)
 - Project report + Final presentation: week 15 (5-9:30pm) **4.5 hours**
 - Project meeting with TA #3: between week 12 - week 15

Subject to change!

Course Project

- Team-based project (3-4 students per team)
- Each team will have at least 1 dedicated TA
 - Mandatory meeting with TA at least once every 3 weeks
- Create your own problems (extra points)
 - **Talk and discuss** with your TAs and me!
 - In the worst case, we will give a project idea
 - Less fun, Less points!

Course Project

- Computational resource (**be conservative!**):
 - \$150 Google Cloud credit per student
 - \$125 Amazon AWS credit per student

Today's agenda

- CSCI 599 overview
- Learning 101
- Course Entrance 1-1

Deep Learning is impacting everywhere

- Machine Learning
- Computer Vision
- Natural Language Processing
- Robotics
- Medical Application
- Graphics
- Finance
- and many more

It's matter of one function

It's matter of one function

Really...?

Let's take a look

It's matter of one function

Ok. It is true...

It's matter of one function

Question

- How is this related to intelligence?
- What does it mean to have one function for all intelligence?

Ok. It is true...

What's the challenge then?

What's the challenge then?

How do we learn this function?

Types of Learning

- Supervised Learning
- Unsupervised Learning
- Weakly / Semi-supervised Learning
- Reinforcement Learning

Definition from Dhruv Batra's deep learning course (ECE 5604)

Joseph J. Lim

CSCI 599 @ USC

Lecture 3

Types of Learning

- Supervised Learning desired output (**Y**) in training data
- Unsupervised Learning
- Weakly / Semi-supervised Learning
- Reinforcement Learning

Definition from Dhruv Batra's deep learning course (ECE 5604)

Joseph J. Lim

CSCI 599 @ USC

Lecture 3

Types of Learning

- Supervised Learning desired output (**Y**) in training data
- Unsupervised Learning **Y** not in training data
- Weakly / Semi-supervised Learning
- Reinforcement Learning

Definition from Dhruv Batra's deep learning course (ECE 5604)

Joseph J. Lim

CSCI 599 @ USC

Lecture 3

Types of Learning

- Supervised Learning desired output (**Y**) in training data
- Unsupervised Learning **Y** not in training data
- Weakly / Semi-supervised Learning some of **Y** in training data
- Reinforcement Learning

Definition from Dhruv Batra's deep learning course (ECE 5604)

Joseph J. Lim

CSCI 599 @ USC

Lecture 3

Types of Learning

- Supervised Learning desired output (Y) in training data
- Unsupervised Learning Y not in training data
- Weakly / Semi-supervised Learning some of Y in training data
- Reinforcement Learning rewards based on a set of actions

Definition from Dhruv Batra's deep learning course (ECE 5604)

Types of Learning

Question

- Ian Goodfellow's talk yesterday
- Where does GAN fall into?

- Supervised Learning desired output (Y) in training data
- Unsupervised Learning Y not in training data
- Weakly / Semi-supervised Learning some of Y in training data
- Reinforcement Learning rewards based on a set of actions

Definition from Dhruv Batra's deep learning course (ECE 5604)

Our goal is “to approximate”

There may exist an exact function (f^*) mapping from X to Y .

Our goal is not to find this exact function.

Rather, we are happy as long as $f(X)$ can **approximate** $f^*(x)$. f does NOT have to be exactly f^* .

This course will be about

- (1) How do we learn this function (using deep learning)?
- (2) How to formulate a problem into this

Our goal is “to approximate”

For $f(X)$ to approximate any $f^*(X)$, f is better to be highly capable.

Our goal is “to approximate”

For $f(X)$ to approximate any $f^*(X)$, f is better to be highly capable.

Deep learning is an effective method for this

- Non-linear (high capacity)
- Hierarchical
- End-to-End learning

Deep Learning is

- Non-linear (high capacity)
- Hierarchical
- End-to-End learning

Linear Classification

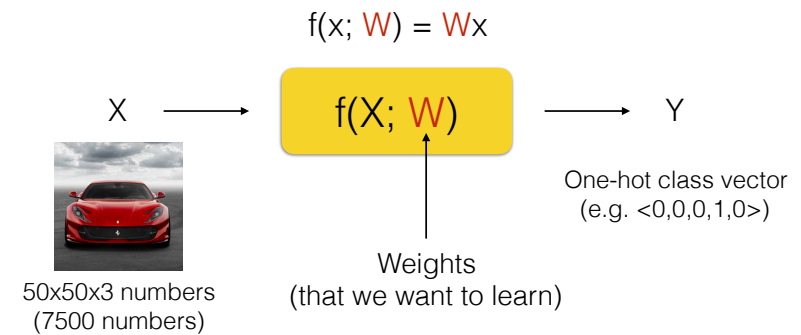

Let's first talk about learning a simple function.

Recap: Image classification

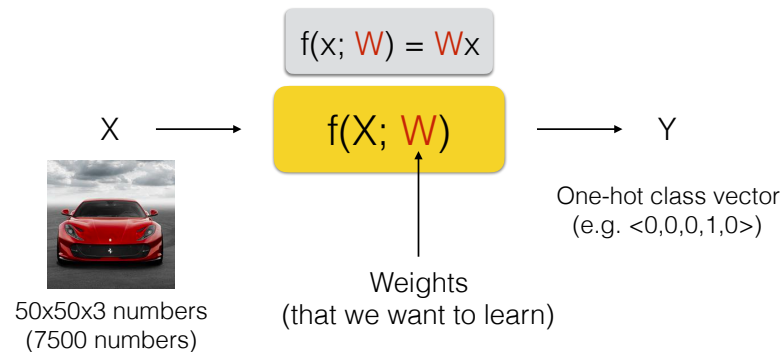

Modified from CS 231N @ Stanford

Parametric Approach

Linear Classification

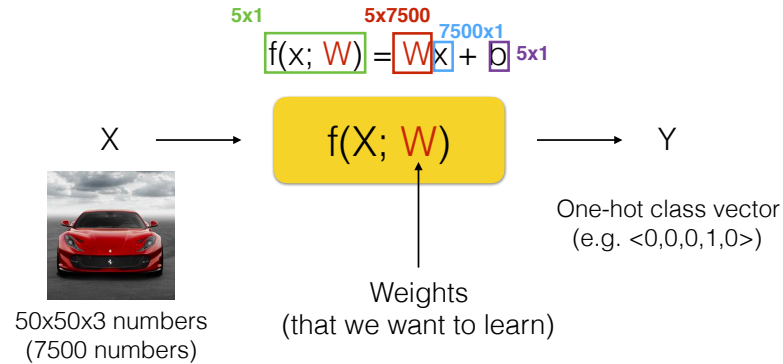

Modified from CS 231N @ Stanford

Linear Classification

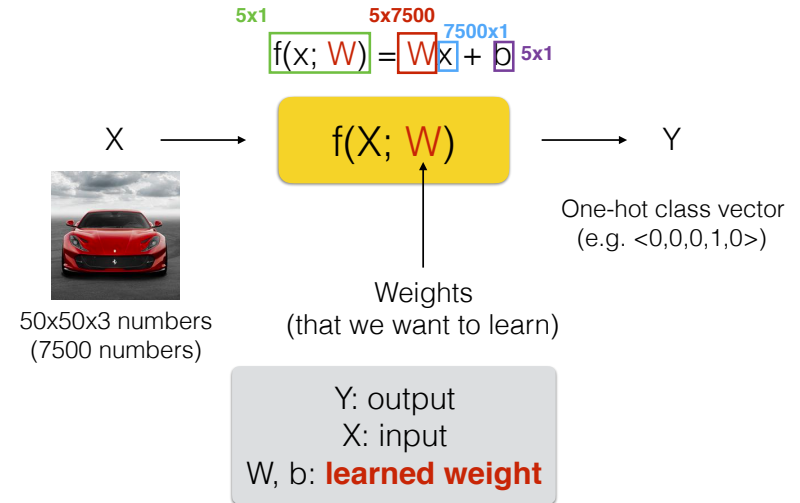

Modified from CS 231N @ Stanford

Linear Classification

Apparently, this is an unit used in deep neural networks too.

Today's agenda

- CSCI 599 overview
- Learning 101
- Course Entrance 1-1

Course Entrance 1-1

- If you talked me individually for any exception, e-mail me now (again even if you have done so).
- Others who need to talk with me, come to me after this lecture.

Todo

- Form your project team (use Piazza if needed)!

Questions?
